

GARCIA GARCIA
DESIGN & BUILD

JAC

Design & Build Industrial

By the National Road #1, where a former ceramic industry once operated, the new JAC Products plant was built.

This Design & Build project for the North American automotive multinational included the demolition of the vacant building and allowed the requalification of the urban landscape.

With a bold and contemporary image, the new building is marked by the jagged and glass facade of the administrative area.

With the help of Garcia Garcia, JAC Products now has modern and functional facilities designed to fit its specific needs. The new building will have a production and storage area, a technical space and a social and administrative block.

YEAR OF CONSTRUCTION: 2019

TOTAL FLOOR AREA: 13.000 m²

PLOT AREA: 42.000 m²

FOOTPRINT AREA: 42.000 m²

PRODUCTION AREA: 10.000 m²
