

GARCIA GARCIA
DESIGN & BUILD

VNC GROUP

Construction Logistics

Strengthening the partnership between companies, VNC Group entrusted Garcia Garcia with the construction of its new logistics center in Trofa.

This new warehouse, destined for the storage and distribution of Tiffosi textile products, will boost the efficiency of the logistics process of the group, allowing the distribution to all the stores.

With a prefabricated concrete structure, the 30-meter free span and single pillars row stand out, raising the floor area and the modularity of the space.

The building is equipped with an automatic warehouse, which allows to increase the storage area and distribution speed.
