DESIGN & BUILD

## WEG - EXPANSION

### Design & Build Industrial

**The Brazilian multinational, which specialises in the manufacture and sale of electric motors, transformers, generators and other equipment, is expanding its industrial unit in Santo Tirso, once again relying on Garcia Garcia.**

The new 26,680 m<sup>2</sup> expansion, which will provide a total facility area of 44,920 m<sup>2</sup>, has 22,000 m<sup>2</sup> devoted to production. This project stands out for its motor testing laboratory unit, which the multinational claims is Europe's most advanced testing laboratory for medium and high voltage motors and drives.

Another of WEG's special features were the specialised pits for inserting production equipment, which were installed during the course of the construction work. These pits had their layout improved to solve problems that had been found in previous layouts.

**YEAR OF CONSTRUCTION:** 2023

**TOTAL FLOOR AREA:** 26 680m<sup>2</sup>

**LOCATION:** Santo Tirso

**LEAD TIME :** 14 months
